

SPACESHIP 160 W - POCKET SYSTEM

TECHNICAL SPECIFICATION

SPACESHIP 160 W - POCKET SYSTEM - MINIMAL POCKET

PRODUCT INFORMATION

Brand: OPK Europe

Door Width: ≥ 760

Door Thickness: W 35-50mm

Door Weight: 160kg

Height Adjustment: ± 3 mm

Damping: Soft Opening & Soft Closing

The OPK Spaceship 160 sliding door system is suitable for heavy duty use in both commercial and domestic jobs. The technically advanced components in each system are market leading and suitable for building your own pocket between 2 studs. The mounting track provides a template for spacing construction of the studs and will later anchor the track in place. The floor guide also attaches to both studs, providing the correct spacing, without needing to damage the existing floor surface. High-quality carriages with ball-bearing plastic rollers move in elegant aluminium profiles EV1, which guarantee a light, wear-resistant and quiet running. Moving parts are protected from dirt by a self-cleaning construction. The assembly is simple, fast and efficient.

Certificate:

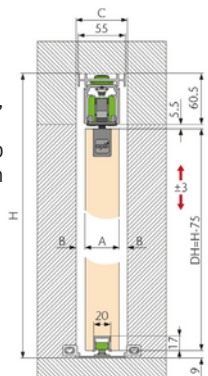

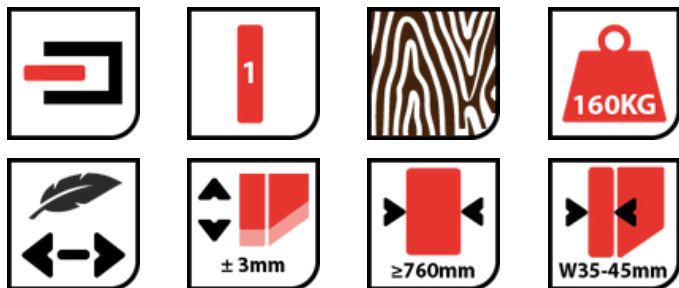

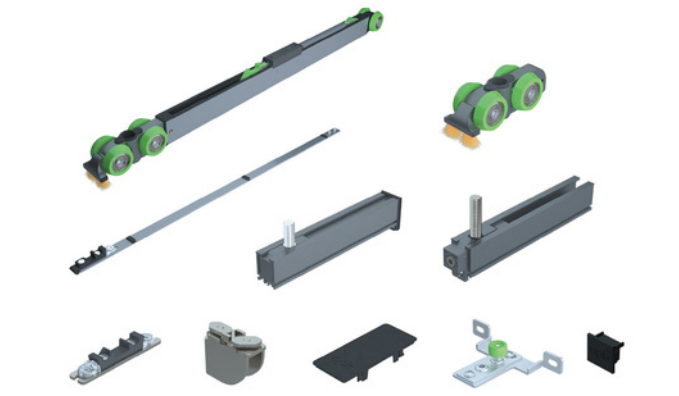

- Tested according to SGS-CSTC EN 1527:2013

Advantages:

- Wooden doors Easy, fast installation, height adjustment +/- 3 mm
- Door weight up to 160 kg
